

WHITEPAPER

Why HTMOON2.0?

HTMOON2.0, a new type of Meme token on HECO Chain! It is a huge influencer of the HECO Chain, one of the creators of the market value of the HTMOON project, and has a huge influence on the HECO chain.

As community development blockchain virtual currency with the leader of Guiyu District (Gui Zhuang) at the core!

We aim to provide the following things:

- Have a strong community background
- Strong community engineering consensus
- There are mysterious investment institutions

This safe and low tax token will bring many features and utilites in the coming future, one of the thing that makes HTMOON2.0 safe is the fact that the liquidity of HTMOON2.0 is locked, which means there is no chance of rugpull.

HTMOON2.0 Swap

HTMOON2.0 aims to bring its own swap so that holders can easily swap eth to HTMOON2.0 back and forth. As the swap is made by the Déjà Vu Team, users can swap tokens in an easy and secure way.

HTMOON2.0 swap will be responsive, and will introduce many groundbreaking features for the Holders like Staking their HTMOON2.0 token. Viewing their old transaction from the connected wallet. Easily accessing the chat and so on.

With the Help of HTMOON2.0 swap Holders can also look at transaction, Holders can view recent transaction happening on the HTMOON2.0 atmosphere as well as look at their positions.

Furthermore features are being discussed as well as the interface are being made more responsive the progress will duly be updated on the Telegram community as well as on other versions of the Whitepaper.
